Barrels & Barrel Alternatives

FOB - South Holland, IL

JACK DANIELS WHISKEY BARRELS

Jack Daniels Tennessee Whiskey Barrels

These barrels are freshly emptied prior to shipment but do not expect them to arrive with residual whiskey left in them.

We can not guarantee that barrels will arrive wet or damp. Barrels are likely to leak a little bit for a few days upon filling.

We will not replace any ""lost"" beer as a result of leaking barrels, we only replace the barrels. All barrels are approximately

4 years old at the time that they are emptied. To determine the barrel's age, you can check the fill date stamped on the

barrel and add 4 years. We can ship in quantities from one barrel to a full truck load, four barrels per pallet.

Because these barrels are previously used, there is no guarantee of freshness or condition. All barrels are sold ""AS IS.""

*Jack Daniels Whiskey Barrels are not a stock item and are shipped directly from the distillery.

<u>Item ID</u>	<u>Product Name</u>	<u>Spec Ord</u>	<u>Package Size</u>	<u>\$/package</u>
JD-WHISKEY	Jack Daniels Tennessee Whiskey Barrels		34" tall, 25" diameter, 53 gallons	\$206.00

Finings and Kettle Defoamer

FOB - South Holland, IL

Bright Tank Fining

A 30% solution of SiO₂, Kieselsol is a purified colloidal solution of silicic acid (SiO₁) in water that has been specifically formulated for the rapid sedimentation of yeast and other haze particles in beer. Vegan friendly.

<u>Item ID</u>	<u>Product Name</u>	<u>Spec Ord</u>	<u>Package Size</u>	<u>\$/package</u>
1026-1	Nalco 1072 - Kieselsol		1 Quart	\$7.95
1026-2	Nalco 1072 - Kieselsol		1 Gallon	\$25.55

Finings

<u>Item ID</u>	<u>Product Name</u>	<u>Spec Ord</u>	<u>Package Size</u>	<u>\$/package</u>
<u>KICK Carrageenan</u>				
GR-KICKCARR-G-10KG	KICK Carrageenan G		10 kg	\$238.00
GR-KICKCARR-MT-1KG	KICK Carrageenan Micro-T		1 kg	\$67.00
GR-KICKCARR-T-10KG	KICK Carrageenan T		10 kg	\$199.00

KICK Carrageenan® kettle finings are an effective way to improve flocculation and clarity in the kettle and throughout the rest of the brewing process. The active ingredient in KICK Carrageenan is kappa carrageenan, a high molecular weight polysaccharide derived from red seaweed. When added near the end of the boil, kappa carrageenan binds to haze-forming proteins and other small particles and flocculates rapidly resulting in improved wort and beer clarity

KICK Carrageenan G: 100 percent granular kappa carrageenan. The particles are large, free flowing to facilitate ease of handling and low dust. Can be added to beer labeled as "organic" or "made with organic." Typical Dose Rate: 10-60 ppm, 20 min before end of boil. Package Size: 10 kg box, polythene sealed liner.

KICK Carrageenan Micro-T: Similar to the KICK Carrageenan T, but in a small tablet format. Typical Dose Rate: 1 tablet (~1 g)/5 gallons, 20 min before end of boil. Package Size: 1 kg box, sealed nylon bag.

KICK Carrageenan T: Refined kappa carrageenan in tablet form. The tablet format provides a convenient delivery method that encourages rapid disbursement in the kettle. Typical Dose Rate: 1 tablet (~30 g)/5 U.S. barrels (bbls), 20 min before end of boil. Package Size: 10 kg box, sealed nylon bag.

Standard size (2,200 pound) totes are available by special order at a rate of 4¢/lb less than our 640+ bag price.

Custom size and blended totes are available by special order. Ask your CMG sales manager for details.

1080-C-1	Irish Moss		5 lb	\$31.50

Isinglass - Dried

Cryofine is purified isinglass in a convenient powder form. It is added to beer at the end of fermentation to speed maturation and improve filtration by removing yeasts and protein particles.

Package Size: 1 lb
 Dosage Rate: 1 - 5g/hl; 0.05 - 0.2 oz/10 bbls

<u>Item ID</u>	<u>Product Name</u>	<u>Spec Ord</u>	<u>Package Size</u>	<u>\$/package</u>
GR-CRY-1LB	Cryofine		1 lb	\$64.00

Cryofine is purified isinglass in a convenient powder form. It is added to beer at the end of fermentation to speed maturation and improve filtration by removing yeasts and protein particles. For the purposes of rapid dissolving, enhanced performance and long shelf life, the isinglass in Cryofine has been pre-hydrolyzed and freeze-dried. Dosage Rate: 1-5 grams/hl; 0.05 - 0.2 ounces/10 barrels

Standard size (2,200 pound) totes are available by special order at a rate of 4¢/lb less than our 640+ bag price.

Custom size and blended totes are available by special order. Ask your CMG sales manager for details.

<u>Britesorb</u>				
GR-SGL-50L	Britesorb A 100	*	50 lb	\$115.50

For chillproofing lighter style beers, Britesorb A 100 is the most effective choice that you can make. The surface of Britesorb A 100 is engineered with moderately sized pore openings that block the entry of larger foam-enhancing proteins. At the same time, the large surface area inside the pores ensures the absorption of virtually all proteins that cause chill haze. Dosage Rate: Beers up to 65% malt ratio: 40-50 grams/hl; 1.4 - 1.8 ounces/10 barrels Dosage Rate: Beers greater than 65% malt ratio: up to 80 grams/hl; 2.8 ounces/10 barrels

Super Moss

A purified form of carrageenan (Irish moss) that is more effective at coagulating and settling out haze-causing proteins in the brew kettle and primary fermenter. To use: rehydrate Super Moss in cooled wort to create a slurry, then stir in the slurry during the last 10 minutes of the boil and whirlpool the wort during chilling.

<u>Item ID</u>	<u>Product Name</u>	<u>Spec Ord</u>	<u>Package Size</u>	<u>\$/package</u>

WATER TREATMENT

Item ID	Product Name	Spec Ord	Package Size	\$/package
	<u>pH Stabilizer</u>			
5S-FIVE2-2	5.2 pH Stabilizer		15 lb	\$104.00
5S-FIVE2-4	5.2 pH Stabilizer		40 lb	\$262.00
5S-FIVE2-7	5.2 pH Stabilizer		7 lb	\$57.00
5S-FIVE2-DRUM	5.2 pH Stabilizer	*	450 lbs	\$2,165.00

5.2 is a proprietary blend of food-grade phosphate buffers (similar to brewer's salts) that will lock in your mash and kettle water at a pH of 5.2 regardless of the starting pH of your water. 5.2 is safe for your mash and WILL NOT add any flavors to your beer. 5.2 will provide consistency of pH in any water conditions, but the most significant gains will be obtained if you are brewing in hard water.

Use 5.2 to optimize your enzymatic activity in your malt, help clarify yourwort, and achieve more consistent hop utilization.

Use 1/3 oz. per 5 gallons of water.

	<u>Phosphoric Acid</u>			
BK-PHA-4	Birko Chemicals - Phosphoric Acid Food Grade		4 x 1 gal	\$138.17
5S-PHA4	Phosphoric Acid		4 x 1 gal	\$148.00

May be used to lower sparge water pH. 10% solution. To get to 10% from 75% - 1:7.5

10 gallon container: Fill with 7.5 gallons of water and 1 gallon of 75% acid. This gives you 8.5 gallons of 10% Phosphoric Acid.

5 gallon container: Fill with 3.75 gallons of water and (2) quarts of 75% acid. This gives you 4.25 gallons of 10% Phosphoric Acid.

1 gallon container: Fill with 105 ounces of water and (14) ounces of 75% acid. This gives you 119 ounces of 10% Phosphoric Acid.

Standard size (2,200 pound) totes are available by special order at a rate of 4¢/lb less than our 640+ bag price.
